**Proposed Agenda:**

1. Discuss where column 2, line 65 – column 3, line 3 and column 9, lines 21-25 of the Wolff reference allegedly teaches the limitation of "sending a first notification of updating data associated with a plurality of disks in a first volume group shared by a first node and a second node".
2. Discuss where column 11, lines 40-57; column 16, lines 42-45 and column 32, lines 7-9 of Wolff allegedly teaches the limitation of "receiving a second notification by said second node indicating that said data associated with said plurality of disks in said first volume group has been updated, wherein said second notification comprises a data identifier."
